

65" 4K PCAP touchscreen built into an eye catching edge-to-edge glass bezel

The ProLite TF6537UHSC-B2AG is an excellent solution for Interactive Digital Signage, Instore Retail, Kiosks and Interactive Presentations. Its 65", 4K (3840 x 2160 pixels) IPS Edge LED LCD screen offers exceptional colour performance, an incredibly sharp and crisp image and wide viewing angles with a gigantic viewable area with 4 times more information and work space than a Full HD screen. The Projective Capacitive 50 point touch technology delivers seamless and accurate touch response.

Touch technology - Capacitive

This technology uses a sensor-grid of micro-fine wires integrated into the glass that covers the screen. Touch is detected because electrical characteristics of the sensor grid change when human finger is placed on the glass. Thanks to the glass overlay this technology is highly durable, and the touch function remains unaffected even if the glass is scratched. It offers perfect picture performance and will work with human finger (also latex gloved) and stylus-pen.

4K

UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image.
